Summary

Cloud and infrastructure professional with hands-on experience in enterprise device configuration, network support, and operational process improvement. Strong foundation in business operations and systems optimisation, combined with developing expertise in networking, cloud engineering, and security-focused IT environments. Experienced in supporting enterprise deployments, troubleshooting infrastructure issues, and collaborating across technical teams to improve efficiency, reliability, and scalability.

Education

University of Wisconsin-Milwaukee

Bachelor of Science in Information Science & Technology

Start Date-Fall 2026

Harper College, Palatine, IL

Associate in Arts

August 2024-May 2026

Relevant Coursework: Network Infrastructure, Cisco Networking, Systems Administration, Information Systems, Database Management, Business Analytics, Financial Accounting

Certifications

AWS Certified Solutions Architect – Associate | Amazon Web Services

Expected August 2026

Cisco Certified Network Associate (CCNA) | Cisco

Expected August 2026

Cloud Security and Audit Fundamentals

February 2026-April 2026

Technical Skills

Networking & Infrastructure: TCP/IP, VLANs, Switching & Routing, Network Troubleshooting, DNS, DHCP, VPNs

Cloud & Systems: AWS (EC2, IAM, VPC), Windows Deployment services, MDT, SCCM, Autopilot

Endpoint Deployment & Configuration: Autopilot, MDT, SCCM, ZTD, Device Imaging & Provisioning, BIOS & Endpoint Configuration

Systems & Data Tools: Microsoft Excel, Word and PowerPoint, Active Directory, SQL

Experience

CDW, Vernon Hills, IL

Configurations Technician,

February 2026 – May 2026

- Led configuration workflows for enterpriselevel deployments supporting Fortune 500 clients, ensuring compliance with security baselines, imaging standards, and assettagging requirements.
- Collaborated with the Quality Assurance team to resolve configuration defects, contributing to a 22% reduction in postdeployment support tickets for assigned client projects.
- Contributed to a quarterly security-focused initiative to validate BIOS settings, encryption status, and endpoint protection installation before shipment, strengthening device security posture.

- Supported a crossfunctional project to standardize documentation for imaging procedures, resulting in an improvement in onboarding efficiency for new technician.

Lithoprint Inc, IL

Networking Engineer Intern

January 2025 – May 2025

- Supported and maintained core network infrastructure (switching, routing, VLAN segmentation), improving system uptime and connectivity reliability across production and administrative environments.
- Diagnosed and resolved network performance issues using packet analysis and monitoring tools, reducing recurring outages and improving incident response time by 30%.
- Lead crossteam technical coordination with Midwest IT Pros, strengthening vendor collaboration and accelerating deployment timelines for infrastructure upgrades and security enhancements.
- Configured network hardening measures, including accesscontrol updates, firewall rule optimization, and devicelevel security baselines, reducing unauthorized access risks and strengthening audit readiness.

Pixel Pro Parts Ltd, Lusaka

Executive Assistant,

November 2022 - August 2024

- Coordinated operational workflows and stakeholder communication for an EU-funded initiative, supporting project execution, documentation, and compliance tracking.
- Collaborated with local and international stakeholders to facilitate project activities, monitor progress, and provide comprehensive administrative support to ensure the successful delivery of project outcomes.
- Maintained accurate financial records using accounting software, ensuring proper filing and documentation of transactions.
- Monitored and recorded company expenses against budget amounts while adhering to company policies.

Projects

- Built and configured segmented VLAN lab environment using Cisco Packet Tracer to simulate enterprise network architecture.
- Deployed AWS EC2 and IAM environments to practice secure cloud provisioning and access management.
- Configured Windows deployment workflows using MDT and Autopilot imaging standards.
- Researched cloud configuration drift and governance strategies in AI-assisted infrastructure environments.

Research

- Researching the operational and security risks associated with AI-assisted cloud infrastructure management, with a focus on configuration drift, governance breakdowns, and long-term technical debt in scalable enterprise environments.
- Analyzing how governance frameworks, infrastructure standardization, and automated compliance controls can reduce operational risk and improve long-term scalability in cloud-based enterprise environments.
