Education

University of Wisconsin-Milwaukee

Bachelor of Science in Information Science & Technology

Start Date-Fall 2026

William Rainey Harper College

Associate in Arts

August 2024-May 2026

Relevant Coursework: Network Infrastructure, Cisco Networking, Systems Administration, Information Systems, Database Management, Business Analytics, Financial Accounting

Certifications

AWS Certified Solutions Architect – Associate | Amazon Web Services

Cisco Certified Network Associate (CCNA) | Cisco

Cloud Security and Audit Fundamentals

Technical Skills

Financial & Data Tools: Microsoft Excel, Word, PowerPoint, SQL, Financial Recording, Expense Tracking & Budgeting.

Core Competencies: Risk Mitigation & Compliance, Quality Control Auditing, Project Documentation, Operational Workflow Optimisation, Multi-Stakeholder Communication.

Advanced Technical Systems: Enterprise Networking Administration, Cloud Architecture (AWS), Endpoint Configuration, Systems & Database Management.

Experience

Pixel Pro Parts Ltd, Lusaka

Executive Assistant,

November 2022 - August 2024

- Coordinated operational workflows and stakeholder communication for an EU-funded initiative, supporting project execution, documentation, and compliance tracking.
- Collaborated with local and international stakeholders to facilitate project activities, monitor progress, and provide comprehensive administrative support to ensure the successful delivery of project outcomes.
- Maintained accurate financial records using accounting software, ensuring proper filing and documentation of transactions.
- Monitored and recorded company expenses against budget amounts while adhering to company policies.

CDW, Vernon Hills, IL

Configuration Technician,

February 2026 – May 2026

- Managed rigorous quality control and compliance audits to eliminate operational vulnerabilities, ensuring 100% adherence to strict regulatory and security frameworks.
- Spearheaded a cross-functional documentation initiative that standardised imaging procedures, reducing new technician onboarding time and increasing team resource utilisation.
- Partnered with the QA team to diagnose and eliminate technical bottlenecks, driving a 22% reduction in post-deployment support tickets and significantly lowering operational overhead.

Lithoprint Inc, IL

Networking Engineer Intern

January 2025 – May 2025

- Supported and maintained core network infrastructure (switching, routing, VLAN segmentation), improving system uptime and connectivity reliability across production and administrative environments.
- Diagnosed and resolved network performance issues using packet analysis and monitoring tools, reducing recurring outages and improving incident response time by 30%.
- Lead cross-team technical coordination with Midwest IT Pros, strengthening vendor collaboration and accelerating deployment timelines for infrastructure upgrades and security enhancements.
- Configured network hardening measures, including access-control updates, firewall rule optimisation, and device-level security baselines, reducing unauthorised access risks and strengthening audit readiness.

Projects

- Built and configured a segmented VLAN lab environment using Cisco Packet Tracer to simulate an enterprise network architecture.
- Deployed AWS EC2 and IAM environments to practice secure cloud provisioning and access management.
- Configured Windows deployment workflows using MDT and Autopilot imaging standards.
- Researched cloud configuration drift and governance strategies in AI-assisted infrastructure environments.

Research

- Investigating the long-term financial and operational risks (technical debt) of AI-assisted infrastructure management, focusing on protecting scalable enterprise environments from governance breakdowns.
- Analysing how automated compliance controls and infrastructure standardisation can directly reduce operational overhead, mitigate risk, and maximise long-term business scalability.
